VOLUME 1

BALTIMORE, MD., FEBRUARY 1, 1930

No. 3

**GEOGRAPHY NOTES**

The red clover seed producing area in Poland lies along the backbone of the Continental European divide. The elevation is high and the winters very severe. Average winter temperature is 5 degrees below zero. It lies nearer the Arctic Circle than any point in the United States, no matter how far north. Poland has supplied the bulk of the adapted clover imported into the United States the last two years.

M. T. Munn, New York State Seed Analyst, says there is no such thing as a bargain in seeds.

**FROM THE ARCHIVES**

In 1919-20, the United States used 20 million pounds of imported clover plus a normal domestic crop at an average price level of 50-60 cents per pound. Will this year's price level of 17-23 cents encourage consumption of supplies that are probably no longer?

**ALFALFA 3 FT. HIGH**

Monticello, Fla.

Although outside what is normally considered the Temperate Zone forage belt, we are growing here Alfalfa three ft. high, Sweet five and splendid crops of Red, White and Alsike.

**U. S. DEPT. AGRICULTURE  
OUTLOOK SOLVES  
CLOVER PROBLEM**

U. S. D. A. outlook report on clovers and alfalfa suggests every producing and consuming farmer holding or buying two years supply of seed. If this is good medicine for the farmer, it ought to be for the seed dealer.

U. S. D. A. says cowpea crop is half sold with prices approximately 25% higher than the five-year average.

Soybeans, too, are half sold, but prices vary little above the five-year average.

**SOCRATES SAYS**

The Agricultural Outlook of 1930 as issued by the United States Department of Agriculture indicates only average prices and prospects for 1930 unless production is kept down. There is only one answer. Reduce the cost of what is produced by maintaining fertility, thus increasing acre yields. Better seeds (i. e. Trinity Brand) are the foundation of any cost reduction program.

**BABSON AGAIN**

Roger Babson says the farming sections offer the best sales opportunities at the present time.
